## Education

BS Information Technology (Expected Graduation: 2026)  
PHINMA Araullo South University

## Experience

### Back-End Developer – Student Project

University, 2nd Year Project

- - Designed and implemented database schemas for a Car Rental web application.
- - Built server-side logic to manage bookings, authentication, and transactions.
- - Developed and integrated RESTful APIs for seamless communication with the front-end.
- - Worked closely with front-end developers to ensure smooth data flow and improve performance.

### Team Leader / Back-End Contributor – Student Project

University, 2nd Year Project

- - Led a team of 5 to deliver a web-based solution within deadlines.
- - Practiced Agile stand-ups and version control with GitHub.
- - Balanced leadership responsibilities while contributing directly to backend logic and database management.

## Technical Skills

Back-End Development: Node.js, Express.js, RESTful APIs

Databases: MySQL, MongoDB

Programming Languages: JavaScript (ES6+), SQL

Front-End (for integration): React, HTML, CSS

Version Control & Tools: GitHub, Trello, Notion

Other: Problem Solving, Team Collaboration

## Projects

### Events Reservation and Management System (Student Project)

- Role: **Back-End Designer**
- Designed and implemented **database schemas** and **server-side logic** to handle catering reservations.
- Supported user authentication, event booking, and data storage for clients.

### Car Rental System – Rent and Go (Student Project)

- Role: **Back-End Developer / Contributor**
- Developed **database structure** and backend features for vehicle booking, return, and management.
- Worked with the front-end team to integrate APIs and streamline data flow.
